

EMC Documentum eRoom to CenterStage Migration Planning

Moving from project collaboration to global innovation

The Big Picture

- EMC Documentum eRoom enables distributed teams to work together more efficiently, optimizing business processes and streamlining decision making.
- People are demanding new capabilities from their collaborative applications, such as social communities, ease of information exchange, and flexibility of the digital workspace.
- Businesses face increased pressure to innovate, improve information exchange and discovery, and adhere to compliance requirements.
- EMC CenterStage drives global communities across the enterprise and unlocks the full value of information while addressing governance, risk, and compliance requirements.

Many organizations have realized the benefits of using EMC® Documentum® eRoom® to provide Web-based collaborative workspaces for distributed teams. With eRoom, project teams around the world accelerate and improve the development and delivery of products and services, optimize collaborative business processes, improve innovation, and streamline decision-making. Moving to EMC Documentum CenterStage™ will enable these customers to drive global communities, while addressing requirements associated with governance, risk, and compliance across the extended enterprise of knowledge workers, customers, and partners.

EMC recognizes that people are working in new and different ways that require the use of social communities, enterprise information exchange, and a more flexible and responsive digital workplace. Leveraging these technologies and new ways of interacting will require consideration of the business, information, and infrastructure aspects of moving to the CenterStage environment.

Simply put, to effectively transition and leverage the full range of features provided by CenterStage, customers will need to determine if the way they work in eRoom today is the way they will work in CenterStage tomorrow.

Defining a migration strategy

Using EMC Consulting Content Management and Archiving eRoom to CenterStage Migration Planning services will provide customers with answers to the following questions:

- How will we port our custom business process in eRoom to CenterStage?
- Will we require the same customization in CenterStage that we required in eRoom?
- What is the easiest way to plan for a migration for my environment?

Our services include:

Phase 1: Survey and analysis

- Review of current eRoom customizations (if applicable) to determine if they are required in CenterStage.
- Mapping of existing eRoom data and documents to the new CenterStage environment.

Phase 2: Migration planning

- Assistance in determining which tools are best suited to the migration of your content.
- Assistance in determining which rooms should be migrated, and in which order, for the quickest ROI.
- Hands-on demonstration and configuration of the migration utility.
- Assistance with the configuration of a pilot set of users and project rooms

Phase 3: Knowledge transfer

- An EMC Consulting resource will work closely with your eRoom and CenterStage administrators to ensure their familiarity with the entire migration process.

About EMC Documentum eRoom

EMC Documentum eRoom is an easily adopted web-based collaborative workspace that enables distributed teams to work together more efficiently. With Documentum eRoom, project teams around the world can accelerate and improve the development and delivery of products and services, optimize collaborative business processes, improve innovation, and streamline decision-making.

About EMC Documentum CenterStage

The EMC Documentum CenterStage client provides a collaborative, easy-to-use Web 2.0 interface to the Documentum content management platform. CenterStage brings social collaboration, document management, and advanced search to every desktop, making content management more accessible to a broader range of knowledge workers within an organization.
