## BUSINESS CHALLENGE

Information and people are the lifeblood of modern business. Employees need to connect with others (inside and outside of an organization), find information, use automated tools, and participate in business processes. As people collaborate on projects, author documents, and get work done, they need to capture, secure, and store the information that is created and enable others to find and reuse it. Over the years, many organizations have established a variety of platforms and technologies to support all of this activity. While often very effective, these purpose-built applications can impose certain barriers to broad-based productivity by creating silos of information and imposing specific access, usage, and functional requirements.

In support of broad collaboration, communication, and process workloads, many organizations have turned to powerful and capable platforms like Microsoft SharePoint to better unify and connect all of this activity. With Microsoft SharePoint technology in place, there is greater potential to resolve many of these challenges and constraints. Microsoft SharePoint in itself is not a solution though—it is a platform to enable business productivity.

Given these common and pervasive challenges and the potential offered by technology platforms like Microsoft SharePoint, how do you get started?

## SERVICE DESCRIPTION

EMC® Consulting Enterprise Portal and Collaboration Architecture and Planning Workshop will help you plan and understand the impact of this technology on your organization. This service includes:

- A pre-planning session with EMC Consulting practice leaders to understand your goals and aspirations
- Interactive white-boarding, requirements gathering, and envisioning
- A vision, strategy, and roadmap definition
- Engagement-results document
- Knowledge transfer

EMC Consulting is a renowned expert in the area of enterprise portal and collaboration technologies and has a large staff of consulting professionals who design and develop high-value solutions. This engagement will be conducted onsite at a one-day workshop, led by two EMC practice leaders who specialize in the areas of user experience, technology architecture, and solution development. We will host a pre-engagement conference call to help us understand your business and context (for planning purposes) and provide a post-engagement, written deliverable to capture workshop results.

## EMC CONSULTING

As part of EMC Corporation, the world's leading developer and provider of information infrastructure technology and solutions, EMC Consulting provides strategic guidance and technology expertise to help organizations exploit information to its maximum potential.
